

Wyevale Nurseries Environmental Policy

Wyevale Nurseries supplies plants wholesale to garden centres and the amenity sector. It is a common goal of all Wyevale companies to show a thorough and ongoing commitment towards operating and working in a manner that, as far as reasonably practicable and possible, safeguards the local, national and global environment.

Wyevale Nurseries will seek to comply with Environmental Management System (EMS) standards, industry codes of practice and customer requirements now and in the future.

It is the responsibility of the all Directors of Wyevale Nurseries to implement this policy liaising with the departmental managers who, within their area of responsibility, give full support to the directors.

All employees within the group are briefed and trained where necessary on the Environmental Policy.

The directors and managers will ensure that they and their staff are made aware of environmental issues which might be affected and influenced by nursery activities.

This is achieved by:

- Incorporation in the business plan
- Discussion at directors, managers and departmental meetings.
- Memos and notices issued on relevant subjects.
- Staff training to ensure environmental strategies are implemented and adopted in a safe and effective manner.

As part of our annual management review procedures, key areas of environmental performance are recorded and are used to set continual targets for improvement.

These targets figure in the business plan and in individual company and departmental objectives.

To support elements of improved environmental performance, Wyevale Nurseries also takes part in HDC trials on site.

Wyevale Nurseries is committed to the prevention of pollution, to reducing any environmental risk, to conserving energy and natural resources, to increasing recycling and thereby minimising waste and to protecting any natural habitats and wildlife.

It is also committed to increasing the amount of recycled water thus reducing the amount of borehole water used.

There will be an ongoing process to ensure compliance with environmental legislation and other requirements where identified. Wyevale Nurseries will make this policy available to staff, customers, contractors and the general public.
