

# **Transplants Stock List 2020-2021**

**For all price enquiries please contact a  
member of the sales team**

## Wyevale Nurseries Transplants

We are a well-established nursery, boasting over 30 years' experience in producing top quality field grown native shrubs, trees and hedging plants. We pride ourselves on being one of Britain's foremost providers of bare root, field grown plants, catering to your individual needs whether they are landscaping, forestry or agricultural industries, local authorities or private landowner.

Our extensive plant range originates from native sourced seed where possible or is produced in the form of hardwood cuttings from our own grown material. We have a dedicated and skilled production team to assist with any enquiries regarding planting or aftercare. We also stock a range of plant protection products to aid establishment if required.

Wyevale Nurseries consists of 3 production sites. As well as Transplants, we have a Tree Production site (both container & field grown) and a Hardy Nursery Stock Container site (specialising in 2ltr to 7.5ltr shrubs and herbaceous plants). We pride ourselves in being the one stop solution for all your hardy plant requirements. Please feel free to contact us. We are happy to help.

## How to find Wyevale Nurseries Transplants

### Directions to nursery site: (Sat-nav: use 'GL19 3LA')

#### From Motorway M50 Junction 2

Take the A417 (south) direction Gloucester. Proceed just 100 metres to see the sign and entrance on the right-hand side. Follow green arrows along trackway.

#### From Gloucester

(12 miles) Take the A417 - direction Ledbury

#### From Hereford

(20 miles) Take the A438 – direction Tewkesbury, then at Ledbury the A417 - direction Gloucester.

#### From Motorway M5 Junction 8

Take the motorway M50 - direction Ross. Leave the M50 at Junction 2.

## Hedging and Forestry Transplants

- We have 250 acres of transplant production (1 and 2-year-old field grown native shrubs, trees and hedging plants)
- 27 miles of seed beds sown every year
- Over 5 million transplants from 40-60cm up to 200-250cm high
- UK natives are a core part of the range
- UK provenance is an important part of the range
- 3000 Cubic meters of cold store space to extend the supply season

### Key

1+0	1-year seedling
1u1	1-year seedling undercut and grown in situ for 1 further year
1+1	1-year seedling lined out for 1 further year
1+2	1-year seedling lined out for 2 further years
fthd	A young feathered tree
0/1	1-year hardwood cutting

**Wholesale Trade Only**  
**Minimum Order of £250 (exc. VAT)**  
**All transplants in bundles of 25**  
**(taller 150cm and above sold individually)**  
**Terms and conditions apply**  
**Please see our website for details**

## Broadleaf Varieties

Listed below is our comprehensive range of broadleaf transplants/hedging. We pride ourselves on the quality of our stock and as they are grown on our nursery in Herefordshire they will ‘transplant’ well in other UK locations. **Stock grown in the UK for the UK.**

	1+1	60/80

## Conifers

Below is the range of conifer transplants available.

<b>Abies nordmanniana</b>	2+2	20/30
(Caucasian Fir)	2+2	30/40
<b>Picea abies</b>	1u1	20/40
(Norway Spruce)	2+1	20/40
	2+1	40/60
	2+2	40/60
	2+2	60/80
	2+2	80/100
<b>Pinus sylvestris</b>	1u1	20/40
(Scots Pine)	2+2	40/60
	2+2	60/80
<b>Pseudotsuga menziesii</b>	1u1	20/40
(Douglas Fir)	1u1	30/40
	1u1	40/60
<b>Taxus baccata</b>	2+2	30/40
(English Yew)	2+2	40/60

## Planting Products

We stock the following key sundries to assist safe establishment of your newly planted transplants. In association with 'Plantworks' we can offer a British-sourced mycorrhizal fungal inoculant; 'Rootgrow Professional'. Applied by us at the point of packing as a gel root-dip. Gel protects roots: inoculant provides a dose of soil symbiotic fungi to aid establishment.

<b>Spiral Guards</b> (for rabbit protection)	60cm h	250 per box

<b>Bamboo Canes</b> (for use with spirals)	90cm h	500 per bale
<b>Mycorrhizal Root Dip</b>		

## Choosing a hedge mix

Two broad categories of hedging exist:

### 1. Rural Hedging

Should mainly consist of *Crataegus monogyna* (Hawthorn) but include a variety of native shrubs such as:

ACER CAMPESTRE (Field Maple)
CORNUS SANGUINEA (Common Dogwood)
CORYLUS AVELLANA (Hazel)
EUONYMUS EUROPAEUS (Spindle)
ILEX AQUIFOLIUM (Holly)

LIGUSTRUM VULGARE (Common Privet)
PRUNUS SPINOSA (Blackthorn)
ROSA CANINA (Dog Rose)
VIBURNUM LANTANA (Wayfaring Tree)
VIBURNUM OPULUS (Guelder Rose)

### 2. Ornamental Hedging

The following varieties are more suitable for use in gardens:

BUXUS SEMPERVIRENS (Box)	Plant a single row 30cm apart
CARPINUS BETULUS (Hornbeam)	Plant a double row 45cm apart
FAGUS SYLVATICA (Beech)	Plant a double row 45cm apart
LIGUSTRUM OVALIFOLIUM (Privet)	Plant a double row 45cm apart
LONICERA NITIDA (Shrub Honeysuckle)	Plant a single row 45cm apart
PRUNUS LAUROCERASUS (Laurel)	Plant a single row 45cm apart
ROSA RUGOSA (Rose)	Plant a single row 30cm apart
TAXUS BACCATA (Yew)	Plant a single row 45cm apart

## Seed Provenance

The area from which seed is collected (provenance) is important; the genetic qualities of such traits as hardiness, speed of growth, form, even susceptibility to disease is influenced by the degree to which a species has adapted to an area. Here at Wyevale Nurseries we have as our first seed-source selection priority, British native source; progeny selected from populations adapted to GB life. Latest research suggests that there is sufficient genetic variation in existing native populations to permit adaptation to Climate Change (Dr Joan Cotterell, Forestry Commission Research Geneticist 2016). At Wyevale Nurseries we buy most of our seed from

the best British tree seed specialist Companies; they are masters of their science. When opportunity arises locally, we also collect ourselves. In both cases, all seed-raised forest and hedging plants have a Forestry Commission vetted seed certificate, available for inspection at our nursery and if requested or required, this information is supplied to you prior to ordering or at the time of despatch.
